PROFILE

Enthusiastic and self-motivated web developer with strong fundamentals in HTML, CSS, JavaScript, Node.js, Express, EJS, and React. Passionate about building responsive, user-friendly web applications. Successfully developed hands-on projects including SqueezeBook, Blog Site, Event Registration Platform, Scary Catch Game, and Permalist, translating learning into real-world applications. Eager to apply my skills in a professional environment through an internship or entry-level role where I can learn, grow, and make meaningful contributions.

PROJECTS

SqueezeBook

- SqueezeBook is a personal book notes web app that helps readers track, rate, and reflect on the books they read.
- Users can add books using an ISBN, auto-fill book details, rate their reads, and write personal summaries and notes.
- Built with Node.js, Express, EJS, and MySQL, the project focuses on simplicity, usability, and meaningful reading reflection.

Event Registration

- A web application that allows users to browse upcoming events, register online, and receive confirmation instantly.
