Personal Profile

Full-stack web developer focused on building RESTful applications using Node.js, Express, React, and SQL/NoSQL databases. Experienced in deploying production projects and implementing authentication, APIs, and responsive UI.

Education

2023 – 2027: BS Computer Science

Islamia University of Bahawalpur
Current Semester: 6
GPA: 3.83/4.00

Projects

SqueezeBook — Book insights sharing platform

Node.js, Express, EJS, Passport.js, REST API

- Built a full-stack platform for publishing and browsing user book insights
- Implemented authentication with Passport.js (local + Google OAuth)
- Integrated ISBN-based API ingestion to auto-populate book metadata
- Developed CRUD workflows with access control and public/private visibility

Live here: https://squeezebook.vercel.app

Personal Portfolio Website — Developer Showcase

React, Tailwind CSS, Vite, Netlify

- Built portfolio UI with React + Tailwind, including interactive project sections
- Structured component architecture and responsive layouts
- Deployed live via Netlify with optimized layout across devices

Live here: https://muhammad-abid-portfolio.netlify.app

WorldWise — Interactive Travel Diary App

React, React Router, Context API, Leaflet, CSS Modules, Netlify

- Developed an interactive travel diary with React, Leaflet, and Context API
- Enabled authentication, map interactions, and city logging with geolocation
- Built responsive UI with CSS Modules and deployed via Netlify

Live here: https://worldwisenet.netlify.app
